- Sales proceeded as planned because salon treatment products, a new category in the North American market, performed well and sales of Liscio, the core straight perm product, showed signs of ceasing to fall.
- Sales overall are estimated to have decreased slightly because hair care products (shampoo and treatments), which provide a high proportion of sales, continue to face a serious challenge.
- The company plans to improve the profit ratio by implementing distribution cost cutting measures this term.

- Customers perceived the differentiation of Milbon from existing manufacturers and the new development of Milbon producthandling salons progressed as planned due to the deployment of sales activities focused on top salons that have acquired wealthy customers in the east China region (Shanghai City, Jiangsu and Zhejiang) and the south China region (Guangdong, Fukien).
- Against the backdrop of Japanese hair styles being fashionable among Chinese women, who are sensitive to trends, Japanese-transmitted beauty techniques and products are evaluated highly by the Chinese salons that lead fashion. As a result, requests for educational activities such as technique workshops, etc., is increasing and sales of hair coloring products and permanent wave products are expanding.

- Sales performed well because the company promoted the new introduction of hair care products centered on salon treatment products at salons that have introduced hair coloring products captured with positive educational support activities for target salons.
- The company is focusing on brushing away its image as a hair coloring product manufacturer by strengthening activities to develop new permanent wave product-handling salons among those that already handle hair color and hair care products. The company aims to establish a position as a general manufacturer in the Korean market in the future.
