Outlook of Milbon Group (FY2014 9 months)

JAPAN (Milbon Co., Ltd.)

Due to an aging population, lower birthrates and a decline in the total population, it is becoming difficult to expand the entire beauty products market. The hair care division, the core of aging care, is doing well, but competition in the hair dyes division is accelerating and as a whole, sales have increased only slightly. In such circumstances, Milbon Japan held an event called "Next Beauty: Power of Beauty" at Saitama Super Arena in July and sent messages to the younger generation—who will play an important role in the industry in the future—to have aspirations regarding the future of the beauty industry and to achieve development together.

USA (Milbon USA, Inc.)

Milbon USA started engaging in sales activities through a distributor in New Jersey, etc. and has proactively cooperated with the distributor's sales team. As a result, the number of partner salons is steadily increasing. It is becoming difficult to increase the sales of the main product—straight perm solution—because competitors have entered the market. However, the second pillar—salon treatment—is selling well.

CHINA (Milbon Trading (Shanghai) Co., Ltd.)

The distributor strategy was changed to multiple distributors in one province in Zhejiang, Jiangsu and Guangdong, and intensive support was provided mainly to newly contracted distributors. Milbon Shanghai earned the trust of the distributors' sales team, which resulted in an increase in the number of partner salons. Milbon Shanghai also held a skills seminar with a Japanese famous hair designer and thereby strengthened its relationship with the top salons in the region, and it has helped Milbon Shanghai increase its sales.

KOREA (Milbon Korea Co., Ltd.)

Similar to Japan, Korea has issues with an aging population and lower birthrates, and the sales of the aging care series Plarmia that launched in May is steadily increasing. In June, Milbon Korea expanded its Seoul Office and also started operating a large studio in which seminars for 200 people can be held. It enables Milbon Korea to provide more diversified training supports for salons and such utilization is being accelerated.

GLOBAL newly developing countries

The number of partner salons is steadily increasing through joint activities with local distributors. In addition, the factory in Thailand has started shipping products to some areas of overseas markets, and a complete shipping system is being developed.
